

Toys

Home Learning Challenge

Have a look at your toys at home. Can you find a toy that can move, a toy that makes sounds and a toy that lights up? How do you make them work? Do you need to push a button? Do they have batteries? Do you wind them up? Talk to a grown-up about the different ways your toys work.

Draw a picture of your favourite toy and write a sentence about it.

Play a game with some people in your family, where you all take turns and follow rules. It might be a board game, a card game or a different type of game altogether. Think about why it is important to take turns and follow the rules when you are playing games.

Talk to a grown-up in your family about the toys they used to have when they were little. Find out if they had any toys that are similar to toys that you have got. How were their toys different? What was their favourite toy?

Design a new toy. Draw a picture or even make a model.

There are 4 cars in the toy box. How many wheels are there altogether? You could draw a picture to help you or even find 4 cars and count all of the wheels!
